

## **Barrel Clamps**

Barrel Clamp - A Barrel Clamp is actually a hydraulic or mechanical attachment designed for a forklift. It can be used so as to clutch the item you wish to transfer with the forklift and is usually utilized for handling paper rolls, barrels, and kegs. Several types of barrel clamp attachments also have a revolving function. Like for example, the rotate function permits a lift truck operator to slot in a vertically stored paper into the horizontal intake of a printing press.
