

Doosan Forklift Parts

Doosan Forklift Parts - Doosan Infracore Company Ltd. is an international organization consisting of Diesel Engines, Defense Industry products, Industrial Vehicles, Construction Technologies and Machine Instruments and Computerization Systems.

Their United States affiliate, Doosan Infracore America Corporation, situated in Suwanee, Georgia houses a 170,000 square foot production facility, home to a Compact Equipment and Construction division. Cleveland, Tucson houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction customer desires.

There are well over 220 Doosan service and product sales locations operating in Canada and the United States. In addition, there are more than 90 independent dealers moving forklift supplies and materials handling equipment. This system allows Doosan Infracore America to aggressively compete in this competitive market. The forklift product line impressively features 63 distinctive products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these various truck designs range from 3,000 to 33,000 lbs. All trucks are built in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest expanding lift truck business in the North American marketplace, thanks to their reliability in maintaining a high degree of consumer service quality and optimum product functioning to all Doosan Infracore Forklift users. The U.S. lift Truck division based in Cleveland has a expert team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial home-based forklift market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. began to import assembled lift trucks as part of a national equipment expansion project. Initial product sales of this manufacturing equipment focused on large business communities, the armed forces and on state-run firms. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical training grew to become the new focus for enhancing quality and product development.

Home-based lift truck trade for Daewoo started in 1967 and grew to an astonishing 90% market share in Korea. By the 1980's, Daewoo's advanced technological improvements combined with sales success placed them in a position of considerable growth of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to assist them in the highly competitive North American materials handling industry. This project proved highly lucrative for Daewoo and their forklift sales expanded greatly. In 1984, the company finished development of a new facility to help in manufacturing high end value-added products for export. In 1993, the corporation had a global sales system and started exporting designs they had established through in-house technology, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into international marketplaces.
