

Electrical Part for Forklifts

Electrical Parts for Forklifts - Lift trucks as well as other lift trucks may have particular labels for use in certain hazardous locations. The mark indicates that this particular model of forklift meets the minimum standards of ANSI/UL 553 utilized for electric lift trucks or ANSI/UL 558 for internal combustion engine lift trucks.

The application for labels used for lift forklifts can be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Maintenance and Operation, Type Designations, and Areas of Use. Ask your local insurance provider and Fire Marshall for more information on the approved uses of industrial powered forklifts in your application.

If the particular lift truck meets the outlined criteria, labels can be placed. A labeled forklift will show the type of designation placed on the nameplate and would have a properly corresponding label placed.
